PROJECT OVERVIEW

The Sandstone Creek Solar Project is a 65 megawatt (MW) solar project located in Eaton County, Michigan in Oneida and Benton Townships. The project will help Michigan achieve its Renewable Portfolio Standard of 15% of electric load by 2021 will help retain the rural aspect of the local community throughout its operational years.

Sandstone Creek will span approximately 550 acres and will connect at the Oneida substation. The project is anticipated to positively impact both the environment and the local economy by producing significant tax revenue and reducing carbon dioxide emissions by 78,000 metric tons each year - the equivalent of taking 12,000 cars off the road every year. Sandstone Creek will be a good neighbor by helping to reduce storm water run-off and improve overall local water quality. The project will have a low profile and will be odorless and noiseless.

PROJECT SPECIFICATIONS

Operational Capacity: 65 MW
Location: Eaton County, Michigan
Capital Investment: ~$96 million
Construction Timeline: 2019
Expected COD: December 31, 2019
Carbon Dioxide Emissions Reduced: 78,000 metric tons annually

ABOUT GERONIMO ENERGY

Geronimo Energy is a utility-scale renewable energy development company headquartered in Minneapolis, Minnesota. Geronimo has developed over 1,600 megawatts of wind and solar projects that are either operational or currently under construction. Geronimo has a multi-gigawatt development pipeline of wind and solar projects in various stages of development throughout the United States. Geronimo provides custom renewable energy development solutions for utilities and corporations looking to harness renewable energy for business growth. With deep roots in agriculture, Geronimo prides itself on developing wind farms that are farmer-friendly, community-driven, and beneficial for rural communities.
