

**FUND OVERVIEW**

- The Crocker Community Fund will be a 501(c)(3) organization, the purpose of which will be to engage in, assist, and contribute money to exclusively charitable activities and opportunities within the communities of South Dakota connected to the Crocker Wind Farm. The Crocker Wind Farm is located in Clark County and spans four townships.
- During operation, the Community Fund will receive up to \$40,000\* annually for 20 years to use towards charitable community projects and opportunities. It will be divided amongst the communities within the Crocker Wind Farm.
- Spending of the Community Fund will be at the direction of the Community Fund’s board of directors, who will be landowners with a wind easement in each of the townships within the wind farm, as well as one at-large director from the community.
- The Community Fund will be operated by volunteers who are completely independent of the operation of the Crocker Wind Farm.
- The goal of the Community Fund will be to provide direct benefit and value to the entire community touched by the Crocker Wind Farm—not just the landowners participating in the wind farm.

**ABOUT GERONIMO ENERGY**

Geronimo Energy is a utility-scale renewable energy development company headquartered in Edina, Minnesota. Geronimo has developed multiple operating wind farms and solar projects throughout the Midwestern United States. Approximately 1,000 MW of wind projects and 200 MW of solar projects developed by Geronimo throughout the Midwest are expected to be constructed by the end of 2016. Geronimo has a multi-gigawatt development pipeline of wind and solar projects in various stages of development throughout the United States. Geronimo provides custom renewable energy development solutions for utilities and corporations looking to harness renewable energy for business growth. With deep roots in agriculture, Geronimo prides itself on developing wind farms that are farmer-friendly, community-driven, and beneficial for rural communities.

\*This figure is based on a formula of \$200/megawatt and may change based on the size of the project.

**CROCKER WIND FARM**

The Crocker Wind Farm is a 200 megawatt facility located in Clark County, SD. It will generate enough clean, homegrown energy to power up to 69,000 homes each year and displace approximately 604,000 million metric tons of carbon dioxide on an annual basis throughout the life of the project.

The Crocker Wind Farm is located in the eastern region of South Dakota, approximately halfway between Aberdeen and Watertown, SD. The average wind speed, measured at 80 meters, is 8.8 meters per second, which is approximately 19.7 miles per hour. The prevailing wind direction is from the northwest and south.
