

WILDER JUNCTION WIND FARM

FUND OVERVIEW

- The Wilder Junction Community Fund is a 501(c)(3) organization, the purpose of which is to engage in, assist, and contribute money to the support of exclusively charitable activities and opportunities within the communities of Minnesota connected to the Wilder Junction Wind Farm. The Wilder Junction Wind Farm is located in Jackson County and includes the township of Delafield.
- During operations, the Community Fund will receive up to \$8,000* annually for 20 years to use for charitable community projects and opportunities. It will be divided amongst the communities within the Wilder Junction Wind Farm.
- Spending of the Community Fund will be at the direction of the Community Fund’s board of directors, who will be landowners with a wind easement in each of the townships within the wind farm, as well as one at-large director from the community.
- The Community Fund will be operated by volunteers who are completely independent of the operation of the Wilder Junction Wind Farm.
- The goal of the Community Fund is to provide direct benefit and value to the entire community touched by the Wilder Junction Wind Farm—not just the landowners participating in the wind farm..

ABOUT GERONIMO ENERGY

Geronimo Energy is a utility-scale renewable energy development company headquartered in Edina, Minnesota. Geronimo has developed multiple operating wind farms and solar projects throughout the Midwestern United States. Approximately 1,000 MW of wind projects and 200 MW of solar projects developed by Geronimo throughout the Midwest are expected to be constructed by the end of 2016. Geronimo has a multi-gigawatt development pipeline of wind and solar projects in various stages of development throughout the United States. Geronimo provides custom renewable energy development solutions for utilities and corporations looking to harness renewable energy for business growth. With deep roots in agriculture, Geronimo prides itself on developing wind farms that are farmer-friendly, community-driven, and beneficial for rural communities.

*This figure is based on a formula of \$200/megawatt and may change based on the size of the project.

WILDER JUNCTION WIND FARM

The Wilder Junction Wind Farm is a 40 megawatt facility located in Jackson County, MN. It will generate enough clean, homegrown energy to power up to 11,000 homes each year and displace approximately 113,000 metric tons of carbon dioxide on an annual basis throughout the life of the project.

Jackson County is located in the southwest heart of Minnesota’s rural and agricultural community. The average wind speed in Jackson County, measured at 80 meters, is 8.3 meters per second, which is just under 18.5 miles per hour. The prevailing wind direction is from the northwest and the south.
