

FUND OVERVIEW

- The Dawson Community Fund will be a 501(c)(3) organization, the purpose of which will be to engage in, assist, and contribute money to exclusively charitable activities and opportunities within the communities of Nebraska connected to the Dawson Wind Farm. The Dawson Wind Farm is located in Dawson county and includes the townships of Farnam and Ringgold West.
- The Community Fund will receive up to \$20,000* annually for a period of 20 years during operation to use for local charitable community projects and opportunities. It will be divided amongst the communities within the Dawson Wind Farm.
- Spending of the Community Fund will be at the direction of the Community Fund's board of directors, who will be landowners with a wind easement in each of the townships within the wind farm, as well as one at-large director from the community.
- The Community Fund will be operated by volunteers who are completely independent of the Dawson Wind Farm.
- The goal of the Community Fund will be to provide direct benefit and value to the entire community touched by the Dawson Wind Farm—not just the landowners with turbines.

*This figure is based on a formula of \$200/megawatt and may change based on the size of the project.

ABOUT GERONIMO ENERGY

Geronimo Energy is a utility-scale renewable energy development company headquartered in Minneapolis, Minnesota. Geronimo has developed over 1,600 megawatts of wind and solar projects that are either operational or currently under construction. Geronimo has a multi-gigawatt development pipeline of wind and solar projects in various stages of development throughout the United States. Geronimo provides custom renewable energy development solutions for utilities and corporations looking to harness renewable energy for business growth. With deep roots in agriculture, Geronimo prides itself on developing wind farms that are farmer-friendly, community-driven, and beneficial for rural communities.

DAWSON WIND FARM

The Dawson Wind Farm is a 100 megawatt facility located in Dawson county, NE. It will generate enough clean, homegrown energy to power up to 40,000 homes each year and displace approximately 6 million tons of carbon dioxide throughout the life of the project.

The Dawson Wind Farm is located in the middle region of Nebraska, approximately three hours west of Omaha, NE. The average wind speed, measured at 80 meters, is approximately 8.3 meters per second, which is just under 18.5 miles per hour. The prevailing wind direction is from the south.
