

## PROJECT OVERVIEW

The Dawson Wind Farm is a 100 megawatt wind farm under development in Dawson County in Nebraska. The project is a development of Geronimo Wind Energy, LLC, DBA Geronimo Energy, LLC. The Dawson Wind Farm's footprint spans Farnam and Ringgold West Townships, and represents a total investment of approximately \$160 million once fully developed. The project boasts strong wind resource, enthusiastic landowners, a welcoming community, and available transmission opportunities.

## PROJECT SPECIFICATIONS

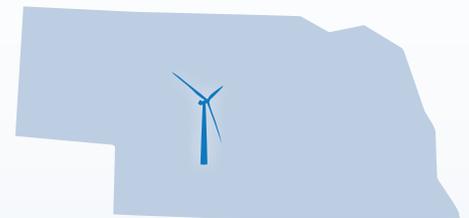

- Operational Capacity:** 100 MW
- Location:** Dawson County, Nebraska
- Project Developer:** Geronimo Energy
- Number of Turbines:** Between 43 and 62, depending upon model selected
- Acres Participating:** Approximately 500
- Construction:** Start 2018
- Expected COD:** 2018

## PROJECT HISTORY

The Dawson Wind Farm has been in development since 2010. The first leases were signed with landowners in early 2011. Geronimo has worked closely with the landowners, local government officials, and local community throughout the development process and the local community has been very receptive to wind development. Geronimo has been collecting wind data in the footprint since early 2012, and a majority of the land for the project has been signed up.

## ABOUT GERONIMO ENERGY

Geronimo Energy is a utility-scale renewable energy development company headquartered in Minneapolis, Minnesota. Geronimo has developed over 1,600 megawatts of wind and solar projects that are either operational or currently under construction. Geronimo has a multi-gigawatt development pipeline of wind and solar projects in various stages of development throughout the United States. Geronimo provides custom renewable energy development solutions for utilities and corporations looking to harness renewable energy for business growth. With deep roots in agriculture, Geronimo prides itself on developing wind farms that are farmer-friendly, community-driven, and beneficial for rural communities.

### DAWSON COUNTY, NE

The Dawson Wind Farm is located in the central region of Nebraska, approximately three hours west of Omaha, NE.

The average wind speed, measured at XX-meters, is 8.3 meters per second, which is just under 18.5 miles per hour. The prevailing wind direction is from the south.
