PROJECT OVERVIEW
The Green River Wind Farm is an up to 212 megawatt (MW) wind farm under development in Whiteside and Lee Counties in Illinois. The project is a development of Geronimo Energy, LLC, a utility-scale developer based out of Edina, Minnesota. Green River is located on approximately 13,500 acres of flat agricultural land in north central Illinois. This site was chosen because the land boasts tremendously competitive wind speeds, and it is situated next to Walnut Ridge Wind Farm, another Geronimo Energy development. Geronimo plans to construct up to 60 turbines and will work with both local and nationally respected construction partners to bring the project to completion. Green River currently includes 45 participating landowners. Construction on the project is anticipated to occur 2016-2017.

PROJECT SPECIFICATIONS
- **Operational Capacity:** up to 212 megawatts (mw)
- **Location:** Whiteside and Lee Counties, Illinois
- **Number of Turbines:** up to 78
- **Acres in Project Footprint:** Approximately 13,500, with less than 39 acres taken out of agricultural production during operation.
- **CO2 Emissions Reduced:** ~600,000 metric tons/year
- **Landowner Payments:** ~$870,000/year
- **Local Community Fund:** up to $42,000/year
- **Direct Local Economic Impact:** ~$83 million over 20 years

PROJECT HISTORY

ABOUT GERONIMO ENERGY
Geronimo Energy is a full-service renewable energy company headquartered in Minneapolis, Minnesota. Geronimo has developed over 1,600 megawatts of wind and solar projects that are either operational or currently under construction throughout the United States. Geronimo has a multi-gigawatt development pipeline of wind and solar projects in various stages of development throughout the United States. Geronimo provides custom solutions for utilities and corporations looking to harness renewable energy for business growth. With deep roots in agriculture, Geronimo prides itself on developing wind farms that are farmer-friendly, community-driven, and beneficial for rural communities.
