

### FUND OVERVIEW

- The Grande Prairie Community Fund is a 501(c)(3) organization, the purpose of which is to engage in, assist, and contribute money to the support of exclusively charitable activities and opportunities within the communities of Nebraska connected to the Grande Prairie Wind Farm. Grande Prairie Wind Farm is located in Holt County and includes the townships of Scott, Steel Creek, Willowdale, Antelope, and Shields.
- The Community Fund will receive up to \$80,000\* annually for charitable community projects and opportunities. It will be divided evenly within the townships contained in the Grande Prairie Wind Farm.
- Spending of the Community Fund will be at the direction of the Community Fund's board of directors, who will be landowners with a wind lease in each of the townships within the wind farm, as well as one at-large director from the community.
- The Community Fund will be operated by volunteers who are completely independent of the Grande Prairie Wind Farm.
- The goal of the Community Fund is to provide direct benefit and value to the entire community touched by the Grande Prairie Wind Farm—not just the participating landowners.

\*This figure is based on a formula of \$200/megawatt and may change based on the size of the project.

### ABOUT GERONIMO ENERGY

Geronimo Energy is a Minnesota-based utility-scale wind and solar energy developer focused on the development of renewable energy projects throughout the United States. With deep roots in agriculture, Geronimo prides itself on developing wind farms that are farmer-friendly, community-driven, and beneficial for rural communities. Geronimo has several operating wind farms in Minnesota and an aggregate development pipeline of over 4,000 megawatts.

### GRANDE PRAIRIE WIND FARM

The Grande Prairie Wind Farm is a 400 megawatt facility located in Holt County, NE. It will generate enough clean, home-grown energy to power up to 145,000 homes each year and displace approximately 51.2 billion pounds of carbon dioxide throughout the life of the project.

Holt County is located in north central Nebraska in a well-elevated and ideal location for wind development. The land is almost exclusively used for agriculture and/or grazing with few trees or obstructions. It is very compatible with the establishment of wind turbines and has received broad community support.

The average wind speed in Holt County, measured at 80 meters, is 19 miles per hour. The prevailing wind direction is typically from the north and south.
